

other than treatment, for the claimed method of cellular implantation and the teachings of the specification are limited to analysis of conduction properties of cells in culture. Furthermore, in the absence of working examples or guidance, Examiner has rejected claims 23-37 because methods of cellular transplantation and/or gene therapy are unpredictable.

The Appendix section enclosed herewith, which presents recent results obtained in our lab, illustrates that genetically modified fibroblasts over-expressing the Kv1.3 ion channel are capable of modifying the electrophysiological properties of myocardial cells in vitro and in-vivo.

These results conclusively demonstrate that the methodology described and claimed in the instant application can be utilized to make and use the methodology of the present invention to modify the electrophysiological properties of cells and tissues, thereby providing evidence that the rejections of claims 13-20 under 35 U.S.C. § 112 first paragraph are unfounded.

CV of Yair Feld and Appendix

**RECEIVED**

MAR 06 2003

TECH CENTER 1600/2900**Curriculum Vita - Yair Feld**

Date of birth: 6.12.71

Place of birth: Israel

Marital status: Married + 1.

Address: Naa'mat 30, Haifa, Israel.

Tel: +972-4-8245801

Fax: +972-4-8245801.

Mobile phone: +972-58-822153.

Email: feld@technion.ac.il

Education:

1992-1995 – B.Sc. in Physics with honors at the University of Tel-Aviv, faculty of physics and astronomy.

1998 – 2000 – M.Sc. in Medical sciences at the Technion – Israel institute of technology.

1995 – 2003 – M.D. at the Technion – Israel institute of technology.

2000 – 2003 – Ph.D. at the Technion - Israel institute of technology. School of medicine, Physiology.

Military service:

1990-1993 - Rank: First sergeant. Position: Officer of manpower. Unit: Infantry.

Current position:

2002- Post doctoral – Technion – Israel institute of technology.

2002 – Member of the board of directors – Relaxis Ltd.

Previous positions:

1994 – 1995 - Non-frontal tutor at the University of Tel-Aviv Faculty of physics.

1996 – 1998 - Physicist in an electro-optics company.

1998 – 2002 - tutor at the Technion faculty of medicine, physiology department.

1995 - 2002 - coach of the Technion's squash team.

Publications:

1. Electrophysiological Modulation of Cardiomyocytic Tissue by Transfected Fibroblasts Expressing Potassium Channels: A Novel Strategy to Manipulate Excitability. **Yair Feld**, Meira Melamed-Frank, Izhak Kehat, Dror Tal, Shimon Marom, Lior Gepstein. *Circulation*. 2002 Jan;105:522-529.
2. Evolution of action potential propagation and repolarization in cultured neonatal rat ventricular myocytes. Gideon Meiry, Yotam Reisner, **Yair Feld**, Stanislav Goldberg, Michael Rosen, Noam Ziv and Ofer Binah. *J Cardiovasc Electrophysiol*. 2001 Nov;12(11):1269-1277.

Active Grant Supports:

Co-Investigator

Modification of excitable tissues by genetically engineered cellular grafts.

State of Israel – Chief scientist office – Nofar program
\$100,000

Principal-Investigator

Genetically engineered cell grafts transfected with ionic channels: A novel cell therapy strategy for treatment of abnormalities in excitable tissues.

Mitchel foundation
\$25,000

Awards:

3.4.2001 – J.J. Kellerman young investigators award – first place on behalf of the Israel Cardiology Association.

Conferences:

1. North American Society of Pacing and Electrophysiology. Assessment of hybrid cardiomyocytic cultures with fibroblasts transfected with potassium channel Kv1.3: A novel approach for gene therapy. **Yair Feld**, Meira Melamed Frank, Leonid Heimovitz, Shimon Marom, Lior Gepstein. 2001.
2. American heart association. Long Term, High-Resolution, Electrophysiological Assessment of Human Embryonic Stem Cell Derived Cardiomyocytes: A Novel in Vitro Model for the Human Heart. Izhak Kehat, Dorit Karsenti, Michal Amit, Mirit Drukman, **Yair Feld**, Joseph Itskovitz-Eldor, Lior Gepstein. 2000.
3. International Society for Heart Research. Evolution of action potential propagation and repolarization in cultured neonatal rat ventricular myocytes. Meiry G, Reisner Y, **Feld Y**, Goldberg S, Rosen M, Ziv N, and Binah O. 2001.
4. International Society for Heart Research. Assessment of hybrid cardiomyocytic cultures with fibroblasts transfected with potassium channel Kv1.3: A novel approach for gene therapy. **Yair Feld**, Meira Melamed Frank, Leonid Heimovitz, Shimon Marom, Lior Gepstein. 2001.
